

Assembly Instructions

TreeKeeper GreensKeeper Large for 9-12' trees

Item No. TK-10110

Kit Includes:

- 1 Wheeled Storage Bag W/ built in Vertical Support rods
- 1 Plastic bottom protective sheet (Partially installed from the factory)
- 2 Horizontal Support Rods

IMPORTANT NOTE: This item is packed **INSIDE** out (Fabric is pulled **OVER** the bottom of the bag). Please read instructions carefully to unpack and assemble.

1. Carefully hinge open the bag from the center until one side is at a 90 degree angle as shown.

2. Find the zippered opening to the bag and begin to move the fabric across the bottom edges and corners of the bag returning the fabric to "inside in" rather than "inside out".

3. Shown here with the top half pulled "outside out".

4. Now do the same for the other side. Shown above is the fabric pulled back over the wheel set once again moving the fabric to "inside in".

5. Now that you have moved the fabric across the back of the bag, the bottom of the bag should be exposed as above. Now turn the bag over right side up and you're ready to begin assembling the side supports.

6. With the bag right side up, you'll see 6 vertical support rods sewn into the corners of the bag (4 on the bottom, 2 on the top.) Locate the rod sewn into the bottom corner of the bag on the **OPPOSITE** side as the wheels.

GreensKeeper Assembly Instructions (Continued)

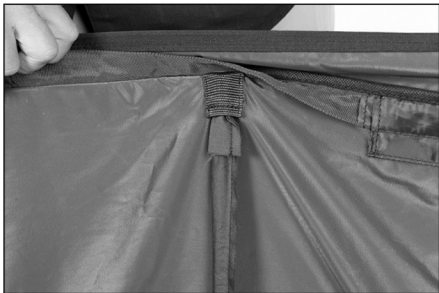

7. Find the sleeve in the top corner of the bag in the same corner as the sewn in vertical support bar.

8. Insert the vertical support rod into the sleeve as shown.

9. Locate the center sleeve on the top of the bag and the vertical support rod sewn into the bottom edge below it.

10. Insert the vertical support rod into the sleeve as shown.

11. Locate the sewn in vertical support rod in the top corner of the wheel side of the bag.

12. Insert the vertical support rod into the hole at the top of the wheel set. Repeat steps 6-12 on the opposite side of the bag.

13. To install the horizontal support bars, locate and open the Velcro pocket located in one of the corners on the top of the long side of the bag.

14. With the Velcro pocket open, locate the long horizontal support sleeve and insert the pole carefully across the entire length of the bag.

15. Once pushed all the way in, insert the end of the horizontal support bar into the sleeve located in the corner of the bag.

16. Close the Velcro strap when done.

17. Once the side supports are installed, reach in and unfold the bottom plastic sheet across to the other side of the bottom and Velcro into place.

NOTE: Please be careful when moving large trees and decor. Contents could be heavy. Handle with care. If you should break any of the support rods, please dispose of carefully and contact us for a replacement part.
